

## **BIO: CLEMENT THOMAS GREY**

Singer-songwriter Clement Thomas Grey has been steadily building a following for his heartfelt and sometimes introspective folk-rock songs. Often drawn to write about serious themes in society today (including mental health, gun violence, addiction and the effect of technology) he also presents honest portrayals of love, gratitude and determination and stories relating personal feelings tied to loss and struggle, Grey connects with listeners by delivering provocative ideas and genuine, realistic words through a soulful voice.

Since releasing his eponymous debut album *Clement Thomas Grey* at the end of 2013, he has occasionally performed as a solo artist and in the Bay Area-based duo, *Grey & Siler*.

Grey lives in the San Francisco Bay Area and is working on new songs for his next album, anticipated for 2018.
